It is important you feed the same amount of food each day to your pet. Weigh out the correct amount of food on digital scales or ask for a FREE Measuring Scoop marked with your pet's total feeding volume.

- We recommend that you divide the total amount of food into a minimum of two meals per day.
- Do not be tempted to overfeed, as your pet may become overweight and less healthy. Daily amounts may need to be adjusted to meet the needs of your pet according to activity, body condition, seasonal changes and current weight.
- Beware that additional supplements, treats and chews can contain food allergens, unbalance the diet or lead to obesity.
- Please ensure that fresh drinking water is available at all times.

If you have any concerns about your pet's nutritional requirements then please consult your OSCAR Nutritional Advisor for further advice or call our FREE Helpline on 0800 195 8000.
