Adult Chicken & Rice

A complete food suitable for adult dogs.

It is important you feed the same amount of food each day to your pet. Weigh out the correct amount of food on digital scales.

When feeding for the first time introduce gradually over 4-7 days.

- We recommend dividing their total daily amount of food into a minimum of two meals per day.
- Do not be tempted to overfeed. Daily amounts may need to be adjusted to meet the needs of your pet according to their activity, life stage and current weight.
- Beware that additional supplements, treats and chews can contain food allergens, unbalance the diet or lead to obesity.
- Please ensure that fresh drinking water is available at all times.
